CEDAR HSP dongles: firmware upgrade for CEDAR Studio 7

Dongles supplied with the original DNS One product require a firmware upgrade to be used with DNS One and other modules within CEDAR Studio 7. If you wish to continue using this dongle with the original software (for example, to allow operation on PPC-based Macs) you must not upgrade the dongle since no downgrade is possible.

For further information on either of these issues, please contact support@cedaraudio.com.
